EDUCATION

University of Virginia

Bachelor of Science in Computer Science

Charlottesville, VA

Aug. 2024 – Dec 2027

EXPERIENCE

Idea Nirvana

AI Engineer Intern

June 2026 – Present

Ashburn, VA.

- Architected an enterprise AI-powered LMS (React, FastAPI, PostgreSQL, SharePoint) with 5+ LangGraph agents, 10+ workflow states, RAG, MCP, and vector search for personalized tutoring and onboarding
- Engineered RAG chunking and embedding pipelines with agent-to-agent handoff logic to ground responses in 100+ enterprise documents via SharePoint MCP connectors, enabling role-based adaptive learning paths
- Developed scalable FastAPI backend services and REST APIs orchestrating multi-agent workflows and PostgreSQL-backed learner state, reducing end-to-end AI workflow latency by 30% through performance optimizations
- Authored technical documentation and system diagrams for the multi-agent architecture, partnering with product and engineering stakeholders to translate feature requirements into implementation specs

GuidePoint Security

Cybersecurity Engineer Intern

May 2026 – Present

Remote

- Automated deployment of 5 enterprise SOC lab environments using Terraform and Ansible, reducing environment setup time by 70% and improving deployment consistency
- Configured and operated 10–25 endpoint environments with centralized Splunk telemetry across Windows and Linux systems for security monitoring and threat detection
- Conducted attack simulations and Nessus vulnerability assessments across deployed environments to identify security gaps and validate infrastructure hardening

U.S. Department of the Treasury

Software Engineer Intern

May 2023 – Aug. 2023

Washington, D.C.

- Developed a Python (pandas) workflow-routing script and optimized SQL queries to prioritize approval requests by urgency and analyst workload, reducing average request turnaround time by 20% across multiple bureaus
- Improved document classification accuracy by 30% by developing, training, and evaluating machine learning models using scikit-learn, TF-IDF vectorization, and logistic regression
- Built user-facing analytics dashboards and REST API integrations using JavaScript and SQL databases to support operational tracking tools for 40+ users

PROJECTS

Code Cartographer - Codebase Graph & Cited Q&A Tool

May 2026 – Present

- Built a static-analysis pipeline (Python, tree-sitter, PostgreSQL) using symbol/call graphs and recursive-CTE queries, indexing 200+ symbols and 500+ edges across Python/TypeScript repos in under 2 seconds
- Developed an agentic QA layer (Ollama/Llama 3.1, FastAPI) with graph + pgvector retrieval, using iterative prompt engineering to chain tool calls and ground answers in 180+ chunks with symbol-level citations

HireReady - AI Career Copilot & Interview Coach

Feb. 2026 – July 2026

- Shipped a full-stack AI career copilot (React, FastAPI, Supabase), integrating and serving Groq LLM/Whisper inference behind JWT-authenticated REST/SSE APIs to deliver resume scoring and voice-transcribed interview coaching
- Architected 3 agentic patterns (Groq tool-calling interviewer, fan-out job ranker, LangGraph pipeline) integrating GitHub's MCP server, debugging and optimizing performance to cut job-scoring latency up to 5x
- Engineered a RAG pipeline (MiniLM embeddings, Supabase pgvector search) with iterative prompt engineering to ground ATS scoring and skill-gap analysis in resume-specific context

Audia - Social Music Discovery Platform

Nov. 2025 – May 2026

- Engineered a full-stack music social platform (React, Node.js, Express, Firebase) with 29 RESTful endpoints across 4 services for discovery, forums, and messaging, developed through Agile sprints with iterative feature releases
- Integrated Spotify OAuth and Web API for personalized discovery features, backed by 28 automated unit and integration tests ensuring reliability across core services

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript

Artificial Intelligence: LLMs, Retrieval-Augmented Generation (RAG), Vector Search & Embeddings, Agentic Workflows, Multi-Agent Orchestration, Model Context Protocol, LangGraph, scikit-learn

Frameworks & Databases: React, FastAPI, Express, Supabase, Node.js, Next.js, REST APIs, PostgreSQL, MySQL

Tools: Git/Github, AWS, JUnit, Docker, Kubernetes, Splunk, Kali Linux, Ansible, Terraform
