EDUCATION

University of Virginia

Bachelor of Science in Computer Science

Charlottesville, VA

Aug. 2024 – Dec 2027

EXPERIENCE

Idea Nirvana

June 2026 – Present

AI Engineer Intern

Ashburn, VA.

- Architected an enterprise AI-powered LMS (React, FastAPI, PostgreSQL, SharePoint) with 5+ LangGraph agents, 10+ workflow states, RAG, MCP, and vector search for personalized tutoring and onboarding
- Built multi-agent workflows that retrieve, reason over, and act upon 100+ enterprise documents via SharePoint MCP and PostgreSQL-backed state, producing grounded responses and adaptive assessments

GuidePoint Security

May 2026 – Present

Cybersecurity Engineer Intern

Remote

- Deployed 5 enterprise security lab environments, provisioning infrastructure with Terraform and Ansible and simulating real-world attacks via Ludus, WireGuard, and Kali Linux
- Administered SOC operations across a 10–25 endpoint environment, monitoring network traffic in Splunk, hardening systems, and running vulnerability assessments for threat detection and infrastructure management

U.S. Department of the Treasury

May 2023 – Aug. 2023

Software Engineer Intern

Washington, D.C.

- Developed Python (pandas) and SQL workflow automation systems that reduced multi-bureau approval turnaround time by 20%
- Improved document classification accuracy by 30% by training machine learning pipelines using scikit-learn, TF-IDF vectorization, and logistic regression models
- Built user-facing analytics dashboards and REST API integrations using JavaScript and SQL databases to support operational tracking tools for 40+ users

PROJECTS

Code Cartographer - Codebase Graph & Cited Q&A Tool

May 2026 – Present

- Built a static-analysis pipeline (Python, tree-sitter, PostgreSQL) that constructs symbol/call graphs across Python/TypeScript repos via recursive-CTE queries, indexing 200+ symbols and 500+ edges in under 2 seconds
- Developed an agentic QA layer (Ollama/Llama 3.1, FastAPI) using retrieval over graph and pgvector embeddings, autonomously chaining tool calls to ground answers in 180+ indexed chunks with symbol-level citations

HireReady

Feb. 2026 – July 2026

- Shipped a full-stack AI career copilot (React, FastAPI, Supabase) integrating Groq LLM/Whisper inference behind JWT-authenticated REST/SSE APIs to deliver resume scoring and voice-transcribed interview coaching
- Architected 3 agentic patterns (Groq tool-calling interviewer, fan-out job ranker, LangGraph pipeline) integrating GitHub's MCP server, cutting job-scoring latency up to 5x
- Engineered a RAG pipeline (MiniLM embeddings, ChromaDB vector search) to ground ATS scoring and skill-gap analysis in resume-specific context

Audia - Social Music Discovery Platform

Nov. 2025 – May 2026

- Engineered a full-stack music social platform (React, Node.js, Express, Firebase) with 29 RESTful endpoints across 4 services for discovery, forums, and messaging
- Integrated Spotify OAuth and Web API for personalized discovery features, backed by 28 automated tests ensuring reliability across core services

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript

Artificial Intelligence: LLMs, Agentic Workflows, Multi-Agent Orchestration, Model Context Protocol, LangGraph, Retrieval-Augmented Generation, Tool Calling, Embeddings, Prompt Engineering, OpenAI, Claude, scikit-learn

Frameworks & Databases: React, FastAPI, Express, Supabase, Node.js, Next.js, REST APIs, PostgreSQL, MySQL

Tools: Git/Github, AWS, JUnit Testing, Docker, Kubernetes, Splunk, Kali Linux, Ansible, Terraform
